

PRESS RELEASE

innowake Solutions Now Also for Spain - New Partnership With Cast Info

Senden, Germany and Madrid, Spain – 25th May 2011. Effective immediately, innoWake gmbh is also working with the Spanish company Cast Info in addition to its German and International partners. This allows the German software company to offer its products in an extremely interesting market while simultaneously ensuring that projects are implemented by experienced local specialists in the native language. “We consider this a very important strategic step,” explains Björn Langmack, Director of Sales and Marketing at innoWake. “Many customers in Spain are still using Natural and suffering from tremendous cost pressure.” In light of this situation, it is little wonder that the first customer consultation took place on the same day the contract was signed. “With Cast Info, we have found a partner with the expertise to implement modernization and migration projects with the help of our solutions,” is how Thorsten Bernecker, the founder of innoWake, describes the situation. Cast Info has grown to more than 550 employees over the past 15 years. The company has offices in Madrid, Barcelona and Bilbao as well as branches in Portugal, Morocco and Chile. With this step, innoWake is further strengthening its leadership position in the field of modernizing legacy applications and migrating Natural, Cobol and PL/1 to Java. Preliminary talks regarding a cooperation agreement with Cast Info quickly revealed that the solutions offered by innoWake are particularly innovative and flexible. “One aspect that we found especially convincing is that the source code remains at least as easy to maintain after a migration or modernization project as it was before,” says Fermin Juarez, founder and Managing Director of Cast Info. “We are looking forward to the first joint project with innoWake, allowing us to realize effective modernization solutions.”

About innoWake

innowake gmbh has been offering innovative, effective and flexible solutions for the modernization of applications and development environments for more than ten years. Addressing problems in existing applications, innoWake resolves them with a unique “soft” modernization approach. innoWake also offers highly automated methods to migrate Natural, Cobol and other applications to Java. The software firm effectively combines expertise in Java, Natural, COBOL and PL/1. innoWake is headquartered in Senden near Ulm and currently has approximately 50 employees. The executive consists of Thorsten Bernecker, Björn Langmack and Mirko Schliemann.
